

After four weeks of the NFL Season, the Fund is up 10.5%. We have provided you with a complete list of the wagers we have made, so you can understand and critique the performance for September in its totality.

On Over/Under Selections, we were 1 – 2.

On Money Line Selections, taking the Underdog, we were 5 – 2.

On Point Spread Selections, taking the Favourite, we were 1 – 0. (You will see that we placed two separate wagers, one at -3 and -115 and the second at -3 and -105.)

Given that we were 7 – 4, the reason why we were up only 10.5% was because our only High Conviction Wager, San Diego to win outright in Indianapolis, turned out to be a loss.

However, we remain confident with our process, and look forward to the remaining thirteen weekends of NFL action!
